RUNWAY EXTENSION PROJECT: Reinbold explained as follows. As is required by the FAA, consultant USKH presented the Airport Board with alternatives for the Runway Extension Project, and the Board selected among them. "Alternative 4 – Shift Runway 470 Feet and Relocate Roadways on an Alternate Alignment" was the alternative selected. Once the selection was made, USKH proceeded with the required environmental assessment. A *Draft Environmental Assessment* (EA) was completed in December 2010 and submitted to the FAA, Port District and County for agency comments. Those comments were recently received and incorporated into the EA. Tonight's meeting commences the required thirty day public comment period. The EA is available for public review on the City's website, City Hall and the Chelan Public Library.

Project Manager Ken Nichols presented the *Draft Environmental Assessment* and described the EA process. Nichols then provided an overview of the Runway Extension Project, reported findings of the EA, and described next steps in the process, i.e. land acquisition, design, roadway relocation and runway construction. During his presentation, Nichols answered questions from the elected officials and audience.

At 7:29 p.m., Baldwin adjourned the Port Commission meeting and Port representatives exited Council Chambers.
