

PUBLIC NOTICE: WEED ABATEMENT

The City of Chelan would like to remind everyone in the City that the key months for the control of noxious weeds are April and May. We recommend the use of a pre-emergence placed on the bare soil prior to noxious weed seeds sprouting or chemical herbicides after sprouting. If you still end up with grass, weeds, shrubs, or bushes that have grown and died and become a fire-hazard they should be cut by June 15th. It is the goal of the City to have all property owners work together to control and abate noxious weeds and fire hazards within the City limits. This will help lower some of the fire-hazard issues that we will face during the dry summer months ahead. Thank you!

Ron Hanson - Code Enforcement Officer / (509) 682-8017 or rhanson@cityofchelan.us
